---

## Summary

A **results-driven iOS and Flutter developer** with over **6 years** of comprehensive experience in **mobile app development**. Expertise in building, customising, and deploying high-performance applications from scratch. Proficient in **iOS Swift, Flutter**, and **macOS** development, with a proven track record of delivering scalable solutions. Strong background in **project management**, client interaction, and delivering solutions aligned with business goals. Adept at implementing modern **design patterns** and **architectures** such as MVC, MVVM, and BLoC. A passionate team player focused on innovative solutions and continuous improvement.

---

## Experience

### Simform LLC – *Software Engineer*

*November 2021 – Present*

- **Led full-cycle app development** for macOS, iOS, and Flutter-based applications.
- Worked on **macOS apps** and **iOS Swift** products like Form app, Auction app, and Nexigo macOS app.
- Built and enhanced **social media apps** and **resident management** solutions using **Flutter**.
- Collaborated with teams to gather requirements, customise features, and fix critical bugs, ensuring **timely app deployment**.

### Tech Integrity Services – *Software Developer*

*September 2020 – September 2021*

- Spearheaded the development of **iOS Swift** apps, with a focus on creating **Uber clone apps** from concept to deployment.
- Engaged closely with clients to develop solutions that met their **business and functional requirements**.

### Elluminati inc – *iOS Developer*

*February 2018 - September 2020*

- Delivered **customised solutions** for product apps including **Eber** (Uber clone) and **eDelivery** (food delivery).
- Conducted client requirement analysis, app customization, feature enhancement, and deployment.
- Successfully developed over **20 customised versions** of product apps, adhering to

client specifications.

## Technical Skills

|                          |                                         |
|--------------------------|-----------------------------------------|
| Language proficient      | Objective-C, Swift, Dart, SwiftUI       |
| Technologies             | Flutter, iOS                            |
| Database                 | SQLite, Firebase, Isar, CoreData, Hive  |
| Architecture & Component | MVC, MVVM                               |
| Patterns                 | Coordinator, Provider, GetX, MobX, BLoC |
| Development Tools        | Xcode, Android Studio, Adobe Photoshop  |
| Version Control & CI/CD  | GitHub, Sourcetree, Fastlane            |

## Projects

### Resident Engagement (Flutter)

- Enhanced user experience for event, building, amenity, maintenance, survey, and service management.
- Developed a digital signage TV app for news and announcements.
- Managed app migrations to newer Flutter versions and handled deployments across Google Play, App Store, and Amazon Store.

### SneakPeek Social Media App (Flutter)

- Upgraded to newer Flutter versions and fixed bugs to improve app performance.

### Parimal Prakashan (Flutter)

- Developed an e-commerce app to sell books, stationery, and electronics, featuring product listings, category filters, and Razorpay integration for payments.

### Image to PDF Maker (Flutter)

- Created a utility to convert images into PDFs, with added features such as barcode scanning, PDF invoice generation, and signature drawing.

### Nexigo (macOS)

- Added features for managing Nexigo camera presets, including video recording and screenshot capture, using the Coordinator pattern.

### Auction Mobility (iOS)

- Implemented features for live and timed auctions, customised white-label products, and handled bug fixes and deployments.

### Royal Graphic and Graphically (Flutter)

- Developed an app for creating branded social media posts and festival banners, integrated with Razorpay for payments, and supported video/image generation.
- 

### Finance Calculator (Flutter)

- Built a comprehensive finance calculator for EMI, SIP, fixed deposits, and tax-related calculations, including PDF report generation.

### Delhi Metro (Flutter)

- Created an offline SQLite-based app to provide possible metro routes and stations, including interchange stations.

### Wiyak - Rider App (iOS)

- Developed features such as daily rides, car rentals, and outstation trips with real-time tracking and payment gateway integration (Tap Payment, KNET).

### Butler - Food Delivery App (iOS)

- Customised the app to support restaurant seat booking and multiple food menus, integrated with card scanning for payments.

### Driven - Taxi App (iOS)

- Developed ride request, scheduling, and trip management features for a taxi app, including multiple trip handling for drivers.

### Fuelio - Gasoline Tracker (iOS)

- Developed a vehicle expense tracking app, allowing users to track refuelling, services, and expenses.

### Contributions & Portfolio

- Contributed to the calendar\_view package on pub.dev.
- Created YouTube content focusing on Flutter and iOS issue resolutions.
